

Power Music 4 Annotations

The purpose of this sheet is to show you the amazingly powerful features of the **NEW** Power Music 4 annotations. You would **never** have all this on screen at the same time! We just created this screen to show you as many as possible of the annotation features. Any sheet of music or even a chord sheet can be annotated. The annotations are an "overlay" so the original music does not get changed. In full screen mode, you can activate the annotation toolbar at any time, by simply clicking in the middle of the page or sheet of music. Annotations can be added, edited, deleted, resized, and saved. When an annotation is selected a properties box pops up, allowing style changes.

Sticky note! This is a sticky note
